

Introducing a pouch for liquid packaging with universal design!

A new style of pouches for liquid packaging designed for better easiness in opening and pouring the content out.

APcut AMPLE CUT®

Patent No.4246760

Enhanced usability of pouches for liquid packaging

Conventional pouches for liquids had several disadvantages including difficulties in finding the cut edge and pouring out the content, and always made your hands dirty when opening the pouch.

"AMPLE CUT" can resolve these issues.

"AMPLE CUT" is a new type of pouch for liquid packaging which enables easy opening and smooth pouring. With universal design, everyone can use it without stress.

Hold it and tear!

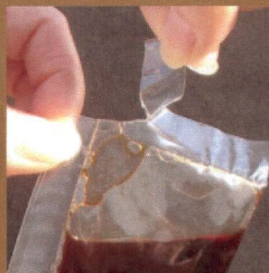

EASY TO OPEN!

EASY TO POUR!

With AMPLE CUT, you can hold the pouch steady and open it easily by tearing along perforation without dirtying your fingers. Unlike conventional pouches which were opened from the side (vertical) sealed part, AMPLE CUT can be opened from the clinch on the opposite side, which enables smooth pouring!

With conventional films...

There were disadvantages including difficulties in finding the cut edge and pouring, and always made your hands dirty.
