Film for High-speed Liquid Filling

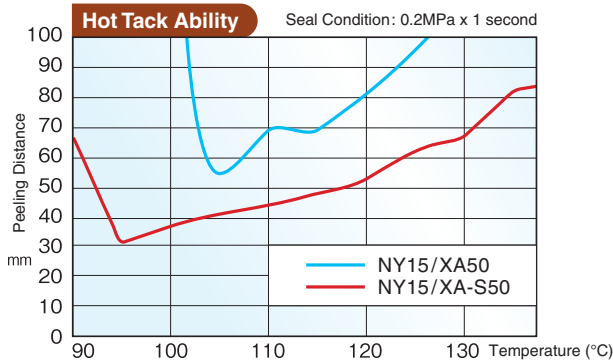

# XA-SUPER

## For ones who wish to Realize Better Seal, Increased Productivity, or Reduced Losses

XA-S is the company's signature film for high-speed liquid filling. Utilizing a unique extrusion laminating technology, this is a liquid filling film in which the various capacities desirable for liquid filling have been upgraded to support high-speed filling. Compared with previous films, the XA-S has outstanding low temperature seal ability, heat seal ability, hot tack ability, foreign substance seal ability, slipping ability, and anti-blocking ability, promising increased filling speeds and reduced losses.

### XA-S Features

- (1) Exhibits a low temperature seal ability that is 10% higher than EVA.
- (2) Shows a heat seal ability, hot tack ability, and foreign substance seal ability.
- (3) The film texture is smooth and soft, and has an outstanding tearing ability.
- (4) Has large strength against impact.
- (5) There is absolutely no EVA odor, and there is only a slight odor of polyethylene.
- (6) The film has little feeling of stickiness, and has outstanding resistance to blocking.

※Due to the regulations in various countries, there may be situations where exporting will not be possible. For more details, please contact our sales representatives.
